

MIDWEST TECHNICAL SAFETY CONSULTANTS

(Comprehensive Loss Control & Risk Management Services)

Midwest Technical Safety Consultants has been providing comprehensive Loss Control and Risk Management services for over a decade. Our programs provide specialized services to clients within the Insurance and General Industries. Our programs are tailored to the specific needs of our clients and offer cost effective and realistic solutions to their safety concerns. Where proper controls do not exist or are found to be insufficient, recommendations will be developed for corrective action. Recommendations are based upon Federal and state codes, such as OSHA, and specific industry standards and best practices as championed by organizations such as the National Fire Protection Association (NFPA) and the National Safety Council (NSC).

We assist with safety plan implementation and can provide follow-up visits to ensure continued safety commitment. MTSC can also present general safety seminars to small or large groups covering a wide variety of best practices that are geared to your occupational needs. Training can include areas such as authorized OSHA 10 hour and OSHA 30 hour Construction and General Industry outreach, as well as state specific training programs, such as Pennsylvania's Workplace Safety Committee Certification.

MTSC Program Development

- Emergency Preparedness & Response
- Hazards Communication
- Job Safety Analysis
- Accident Investigation
- Comprehensive Safety Program – Development & Implementation
- Premises Life Safety Analysis
- Fleet Maintenance and Driver Screening Study

Our safety and loss control programs will enable your insureds to provide and maintain a safe and healthy workplace for their employees and guests, while helping you reduce your costs associated with potential losses.

Our safety consulting services are distinctive:

- Real-world solutions are tailored to be appropriate and affordable based on business size and risk-level; solutions can be adjusted so the new venture is not treated the same as the veteran organization.
- Consults are conducted in a timely and efficient manner in appreciation of you or your client's valuable time as well as reflecting an adequate sense of urgency in implementing solutions to correct real problems.
- MTSC consultants have years of experience in the Insurance and General industries and hold a variety of designations including Certified Safety Professional

(CSP), Masters of Public Health (MPH), Associate in Risk Management (ARM), and are OSHA-trained as well as members of the National Safety Council.
